

Our Strengths

The Associations and Cooperatives of families of our **Consortium "Famiglie Solidali"** ("Sympathetic Families"):

- **Constitute** a new form of youth ministry for the families, supported by the "Office for the Families" of the Vicariate of Rome.
- **Profit** by the experience of the ACLI (Italian Association of Christian Workers), collaborating with the Vicariate in supporting the Associations and the Cooperatives of families.
- **Develop** new forms of cooperation with the Government institutions: Municipalities, City Councils, and Regions.
- **Offer** their support as Volunteers for all the management and administration services, in order to save financial resources for assisting families, and for paying workers for the different services.
- **Carry on** a form of original inter-generational solidarity among young families and mature families, where the elders—generally retired people—manage and organize the services for the younger families. This is a new model of "patriarchal family", not based on the "flesh and blood", but on sharing the same needs and same Human and Christian values.

Our Project

The School-Tutoring Service (STS) aims at tutoring students with homeworks, before all, supporting them in a creative and constructive way. The service aims also at supporting their families, which too often are unable to help their children in the performances of educational obligations, so to save parents time to stay fairly with their children. Moreover, STS aims at creating a socialization and cultural center where, besides studying, students can grow in a pleasing harmony and in a constructive friendship. STS is promoted and managed by the 'Association "Development and Solidarity NGO" in collaboration with the Consortium "Famiglie Solidali" ("Sympathetic Families"), with the Basilica Santa Pudenziana, and with the "Filipino School in Italy", in order to satisfy:

1. The need for school support, education and training for the children of working parents;
2. The need of Immigrant family children for endowing them with an adequate support for their full integration in the Italian Society and Culture;
3. The need of rediscovering both shared cultural (music, theater, computer school...), and school engagements, as well as the joyful experiences of playing together, as a creative time for growing up in a creative way;
4. The need of overcome the loneliness our children often live in their homes, for developing fully their socialization dimension;
5. The need of preventing the plague of the early school abandon for all our children.
